PREFACE

"In the summer of 1925 American citizens of Norwegian birth and ancestry gathered in sundry places to take proper note of the fact that a full century had passed since the first shipment of Norse emigrants had sailed forth to build new homes in the western world. On these occasions a prominent question was always this: What have we Americans of the Norwegian race accomplished in these hundred years? *** No doubt one could *** write *** of what success our people have attained in business, in politics, in art, in the field of religion, or even in professional life; but those subjects lie without the limit of the present survey. There is, however, a series of questions that are not so frequently asked and have never been adequately answered***. What have we achieved in the field of American scholarship? What share have we had in the promotion of knowledge? What important discoveries have we made and published? What recognition have we received in the guilds of scientific thought?"

Thus writes that eminent historian, Dr. Laurence M. Larson of the University of Illinois, in *Studies and Records*, Publications of the Norwegian-American Historical Association, volume II, page 63. The present work aims to answer, in part, those questions. It is a record, though necessarily incomplete, of the contribution of the people of Norwegian origin to the education and scholarship of America. It contains biographical sketches or entries of 860 men and women of Norwegian birth or ancestry who have served as members of the faculties of about 400 American universities, colleges, and other degree-conferring institutions for periods ranging from one to forty-seven years and with ranks varying from that of instructor to president.

Owing to the difficulty of obtaining the desired data and of keeping the information up-to-date during the process of preparing and publishing a work of this type, the educators listed herein have to their credit a considerable number of accomplishments which, unfortunately, are not included in the biographical sketches appearing in this volume. A general survey of the data given here, however, shows the following with respect to the men and women listed as American educators:

About 230 of them have taken or are about to take the degree of Doctor of Philosophy. This seems a very fair percentage in view of the fact that only 69 out of the 190 presidents of the universities and colleges approved by the Association of American Universities, the North Central Association of Colleges and Secondary Schools, and the Southern Association of Colleges and Secondary Schools had taken this degree in 1929 when President Homer P. Rainey wrote an article on the subject in School and Society for October 26 of that year.

Of those who have taken the degree of Doctor of Philosophy, one educator took it at the age of twenty-two, which is the record for that particular university since its founding 120 years ago; eight others took this degree at

the age of twenty-three; four took it at the age of twenty-five; thirteen at the age of twenty-six; and eleven at the age of twenty-seven. The man who did the work for this degree in the shortest time on record at the Johns Hopkins University, came to this country from Vestfold a few years ago, and in addition to pursuing his advanced studies served as full-time instructor in mechanical engineering in thermodynamics and mechanics at the same university. All told, approximately 600 of these educators have taken *some* advanced degree.

About 450 of them have been members or fellows of learned societies. One hundred have served as officers of such organizations, having held, among other offices, those of secretary of the American Institute of Chemical Engineers for eighteen years; vice-president of the Society for the Promotion of Engineering Education: vice-president of the National Education Association twice; vice-president of the American Association for the Advancement of Science three times; vice-president of the American Dental Association; president of the Dental Faculties Association; president of the National Association for the Promotion of Secondary Education; president of the National Biological Society; president of the American Society of Ichthyology and Herpetology; president of the Association of Official Agricultural Chemists; president of the Society of American Bacteriologists; president of the American Association of Pathologists and Bacteriologists; president of the American Society of Immunologists; president of the American Neurological Association; president of the American Electrotherapeutic Association; president of the American Phytopathological Society; president of the American Statistical Association; and president of the American Mathematical Society. In American Men of Science, eleven of them are classed as leading scientists of America in the fields of astronomy, biology, botany, chemistry, mathematics, pathology, physics, and plant physiology.

They have written, translated or edited between 900 and 1,000 books and larger bulletins in English, French, German, Norwegian, Russian, and Chinese, books which have passed through as many as twenty-six editions and have been translated into many other languages, including Italian, Spanish, Greek, and Japanese.

Important scientific contributions are, however, very frequently embodied in papers contributed to scientific journals. The papers and articles contributed to such and other journals by these educators run into many thousands, and if collected would make a scientific library of considerable importance.

More than 300 of the educators listed herein have been full professors or heads of departments. Twenty-two have served as deans or directors of twenty-six colleges. And sixteen have been presidents of eighteen different American universities and colleges (if three Norwegian-American four-year colleges were included in the count, the figures would be nineteen presidents of twenty-one colleges and universities).

They have been awarded more than 180 fellowships and scholarships in this and other countries. They have been honored with about twenty decorations by various governments. And they have had bestowed upon them more than sixty prizes, awards or medals, including the Edison medal, the English

gold medal, the Grasselli medal, the Howard N. Potts gold medal, the John Scott medal, the Reusch medal, the medal of the Royal Photographic Society of Great Britain, the Walker 1st prize, the Walker grand prize, award by the Social Science Research Council, grant by the American Council of Learned Societies, award by the National Research Council, the Rochester Civic Award of \$500, the annual \$1,000 award of the American Association for the Advancement of Science, and a \$2,500 prize offered by the United States Department of Agriculture.

At least 94 of these men and women have been listed in Who's Who in America. 115 have had their biographical sketches in American Men of Science. And about 350 have been listed in some work of reference ranging from one of the various Who's Whos to the leading encyclopedias of America and Europe.

The statistics given above do not include titles or ranks held in Norwegian-American colleges, nor do they refer to the men and women listed as World Educators.

With respect to the order of arrangement of the data given in each sketch, it should be noted that the plan generally followed has been to give, first, the present or what may appear to be the most important teaching position in a strictly American institution, this to be followed by the various other positions listed in chronological order. The grouping of the data under various topics, and the printing of the topical words, such as Author, Member, and Born, in bold-faced type, will enable the reader to locate almost instantly any item of information looked for.

The appendices include a list of sixteen Rhodes scholars from six American States and three nations; a list of forty World Educators who have served at universities and other institutions of higher learning in all parts of the world; a number of historical and other notes; and, finally, a list of about 400 American universities and colleges in which the 860 men and women listed herein have taught, with the location, history, enrollment, and number of teaching staff of each institution.

While the present work is confined to those engaged in teaching and research work in universities and colleges aside from those maintained by the Norwegian people, there are three other groups of American educators and scholars of Norwegian origin to whom reference should be made. The first group consists of those whose names are found in Patterson's American Educational Directory, Who's Who and Why in After-War Education, Private Schools, Who's Who in Education, and various other reference works, who hold executive or other important positions in the field of education, or who labor unheralded and unsung developing the minds and building the character of future citizens in the elementary and secondary schools of America. The second group includes those whose biographies grace the pages of School Calendar, 1824-1924, American Men of Science, Who's Who in Education, Who's Who in American Education, Who's Who in America, and numerous similar works, whose lives and energies are devoted nobly and efficiently to educational and scientific work in the schools and colleges maintained by the Norwegian people in the United States and Canada. And the third group

embraces those whose biographies are contained in American Men of Science, Who's Who in Mining and Metallurgy, Who's Who in Engineering, Who's Who in American Medicine, Who's Who in America, and many other similar works, who, in the various pursuits and professions falling within the realm of science, are adding to human knowledge and applying that knowledge in making life richer and man happier.

During the progress of the present investigation the writer has come across a considerable number of educators whose names point to a Norwegian origin, but whom it has been found impossible to trace to the point of contact. Others, with similar names, have been located, but all efforts to obtain definite information from or about them have proved futile. There is also a third group whose names no longer indicate their national origin. The biographical sketches presented herein are the results of several years' intensive investigation, including a careful examination of the available records of approximately 1,000 degree-conferring institutions, a vast amount of reading, particularly in the field of university and college publications and biographical works, and the sending out of many thousands of questionnaires and letters of inquiry.

The writer wishes to record his gratitude to Dr. Theodore C. Blegen of the University of Minnesota, Dr. Knut Gjerset of Luther College, and Dr. Laurence M. Larson of the University of Illinois for the inspiration which their historical researches have furnished him; to the educational institutions whose records have been made available for examination; to the numerous libraries whose facilities for research have been placed at his disposal; and to that host of men and women in all parts of the country who have shown a kindly interest in the compilation of the record here presented and have furnished information in connection with it.

JOHN A. HOFSTEAD.

INTRODUCTION

The achievements of the pioneers who followed in the trails blazed by Cleng Peerson and Ole Rynning have been recorded by historians and celebrated by novelists, but no writer has probed deeply into the complex cultural ramifications of that story from the first pioneering generation down to the present.

One of those ramifications forms the theme of this biographical dictionary—the part played by Norwegian-Americans in American education and in the promotion of knowledge. In exploiting this theme Mr. Hofstead has not contented himself with generalizations. At the expense of infinite care and unceasing labor over a period of several years he has collected biographical and bibliographical details, revised and arranged them, and set them forth. The resulting volume comprises a storehouse of dependable and useful information and deserves a respected place among American biographical works.

Mr. Hofstead has a passion for facts. He presents the results of his investigations, permitting the record to speak for itself. Supplemented by the School Calendar, 1824-1924, which contains biographical information about teachers and scholars identified with Norwegian-American institutions, it goes a long way toward supplying a quantitative answer to the very interesting questions raised by Professor Laurence M. Larson and quoted in the preface to this volume.

Though a quantitative measure can furnish no final answer to some of Professor Larson's questions, it seems clear that in the field of scholarship Norwegian-Americans have vigorously taken up the challenge of their pioneering heritage. The record that Mr. Hofstead has compiled is to a very considerable extent one of pioneering, a record of scholars who, in one way or another, have extended the frontiers of knowledge. Some of the names that he includes are famous; many are little known, however; and not a few are almost wholly unknown among Norwegian-Americans. The scholarly contributions with which the various names are associated range from the humble to the important. One spirit gives coherence to the record, however, and that is the spirit of intellectual pioneering.

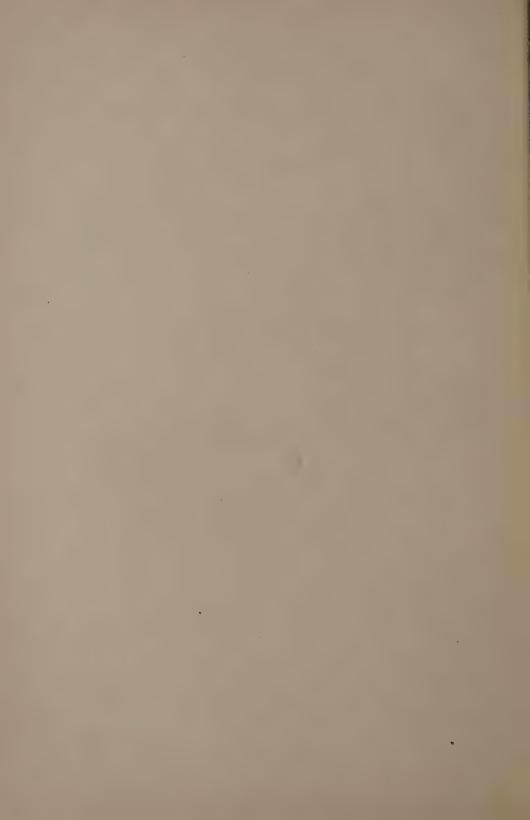

Though I do not find myself wholly in agreement with the compiler in reference to the principles of selection that he has applied, I believe that he has done a very valuable piece of work and I bespeak for it a cordial welcome from the public.

AMERICAN EDUCATORS OF NORWEGIAN ORIGIN

AAMODT, OLAF SVERRE, B.S., University of Minnesota, 1917; M. S., ibid., 1922; Ph. D., ibid., 1927. Associate Professor of Genetics and Plant Breeding, in charge of Cereal Breeding, University of Alberta, Edmonton, Canada, 1928—. In U. S. Army (in foreign service, 17 months, serving a total period of 27 months, one of the survivors of the torpedoed troopship Tuscania), World War; Associate Plant Pathologist, U.S. Department of Agriculture, stationed at the University of Minnesota, 1917-28; Instructor in Genetics, University of Minnesota, 1924-28. Made a tour of the British Isles, Norway, Sweden, Denmark, Germany, Belgium, and France, studying methods in genetics and plant pathology, and making personal contact with the various workers in these fields, Summer 1928. Author: "Controlling flax wilt by seed selection" (with others), Journal of American Society of Agron-omy, Vol. 11, pp. 291-298, 1919; "Breeding wheat for resistance to physiologic forms of stem rust," ibid., Vol. 19, pp. 206-218, 1927; "Correlation between yielding ability, reaction to certain diseases, and other characters of spring and winter wheats in rod-row trials" (with others), *ibid.*, Vol. 19, pp. 896-909, 1927; "The ef-fect of fertilizers on the development of stem rust of wheat" (abstract, with E. C. Stakman), Phytopathology, Vol. 12, 1922; "The Inheritance of rust resistance to several biologic forms of Puccinia graminis tritici in a cross between Kanred and Marquis wheats" (abstract), ibid., Vol. 12, 1922; "Inheritance in wheat of resistance to black stem rust" (with others), ibid., Vol. 15, pp. 371-387, 1925; "Physiologic evidence on the genetic identity of natural and synthetic strains of wild emmer" (with M. N. Levine), *ibid.*, Vol. 15, pp. 553-558, 1925; "A study of growth habit

and rust reaction in crosses between Marquis, Kota, and Kanred wheats" (thesis for Ph. D.), *ibid.*, Vol. 17, pp. 573-609, 1927; "Correlated inheritance in wheat of winter-spring habit of growth and rust resistance' stract), Anatomical Record, Vol. 23, 1922; "A study of the inheritance of winter hardiness, growth habit, and quality of seed in crosses between spring and winter wheats" (abstract, with H. K. Keyes), *ibid.*, Vol. 34, 1926; "The inheritance of growth habit and resistance in a cross between two varieties of common wheats," thesis for M. S.; "The inheritance of growth habit and resistance to stem rust in a cross between two varieties of common wheat, Journal of Agricultural Research, Vol. 24, pp. 457-469, 1923; "The mode of inheritance of resistance to Puccinia graminis with relation to seed color in crosses between varieties of durum wheat" (with J. B. Harrington), *ibid.*, Vol. 24, pp. 979-996, 1923; ton), *ibid.*, Vol. 24, pp. 979-996, 1923; "A study of rust resistance in a cross between Marquis and Kota wheats" (with H. K. Reporting the final concert of the American Conservatory Symphony Orchestra at Orchestra Hall, Chicago, May 7, 1928, the American Conservatory Bulletin of Aug. 1928 says, "Especially note-worthy was the thoroughly poised and brilliant playing of the Grieg piano concerto by the fourteen year old Storm Bull * * *. Uproarious applause was showered upon him after he arose from the piano, and it is doubtful whether any of the distinguished artists that have appeared on the same stage ever had to respond to a greater number of recalls than did this modest young scion of two famous Norwegian musicians-Edvard Grieg and Ole Bull." (See also The Music News of Oct. 18, 1929, with respect to his

appearance with the Philharmonic Orchestra of Oslo.)

(to be published); "Quadratic flat-complexes in odd-dimensional space and their singular spreads; flat-sphere transformation," Proceedings of the International Mathematical Congress, Toronto, 1924, Vol. II; "The longitudinal vibrations of an elastic pendulum," Proceedings of the West Virginia Academy of Sciences, Vol. 1, 1928; "Grassmann's Projective Geometry. A Review," Bulletin of the American Mathematical Society, 1929. Member: American Mathematical Society; Mathematical Association of America; Phi Beta Kappa; Circolo Matematico Di Palermo (Italy); Deutsche Mathematiker Vereinigung; Fellow, American Association for the Advancement of Science; Secretary, West Virginia Academy of Sciences, 1905-06; President, same, 1906-07 and 1926-27. Member, International Mathematical Congress, Toronto, 1924. Biography in Who's Who in America; Who's Who in Science—International, London, 1914; J. C. Poggendorf's Biographisch Literarisches Handwörterbuch, Leipzig and Berlin, 1925; American Men of Science, 1906, 1910, 1921, 1927 (classed as one of the 80 leading American mathematicians since 1910). Born at Ny Hellesund, near Christiansand S., Jan. 27, 1867; came to the United States in 1888.

EKERN, EMIL ALFRED, B.S., in E.E., University of Wisconsin, 1903; M.M.E., Cornell University, 1904. Instructor in Civil Engineering, Cornell University, Ithaca, N. Y., 1905-06. Fellow in Electrical Engineering, Cornell University, 1903-04; Electrical Engineer. Born in the United States; parents came from Biri, Gudbrandsdalen; cousin, Dr. Andrew Ekern, was Lecturer in the University of North Dakota School of Medicine, 1909-13, now Physician of San Diego, Calif.; brother of Hon. Herman L. Ekern, Speaker of the House of Representatives, Wisconsin, 1907, Commissioner of Insurance, State of Wisconsin, 1911-15, Attorney-General of Wisconsin,

1923-27, given the second largest vote for Candidate for Vice-President of the United States at the Republican National Convention, Kansas City, 1928 (see Who's Who in America).

ELIASSEN, REUBEN H., A.B., St. Olaf College, 1921; A.M., Columbia University, 1925. Professor of Secondary Education, Birming-ham-Southern College, Birming-ham, Ala., 1925 to date; also Di-rector of Teachers Training, Freshmen Intelligence Testing, Extension Work, and Appointment Bureau, same. Author: "Exploration in the Field of Critical Think-' Alabama School Journal, 1927; "Intelligence Testing at Birmingham-Southern College," Birmingham-Southern College Bulletin, Vol. 20, No. 3, June 1927. Member: National Education Association; Phi Delta Kappa (national education fraternity); Kappa Phi Kappa (pro-fessional national educational fra-ternity); Alpha Tau Omega (national social fraternity). Born at Aneta, N. Dak.; paternal grandparents (Vake and Dyrnes) came from Ölen and Fjelberg, Söndhordland; maternal grandparents, from Sogn; father, the late Rev. Henry Eliassen, served as paster at Cooperstown and Aneta, N. Dak., 1892-1912; brother, Evan M. Eliassen, has been Supt. of Schools at Spring Grove, Minn., for many years, and was the winner of State Oratorical Contest in the Norwegian language with an oration on "Slaget paa Stiklestad;" distant relative of John Koren (q. v.).

ELLESTAD, REUBEN BEN-JAMIN, B.S., M.S. Instructor in Chemistry, Tufts College, Tufts College, Mass., 1928—.

ELLINGSON, ANITA MARIE, R.N. Instructor in Materia Medica and Therapeutics, University of Illinois College of Dentistry, Chicago, Ill., 1923 to date.

ELLINGSON, EMIL OSCAR, B.S., St. Olaf College, 1906; A.M., University of Wisconsin, 1910; Ph.D., *ibid.*, 1912. Instructor in

Chemistry, University of Wisconsin, Madison, Wis., 1909-19. Instructor in Chemistry, St. Olaf College, 1906-09; Professor and Head of the Department of Chemistry, St. Olaf College, 1919 to date. Author: "On Abietic Acid and Some of its Salts," Journal of American Chemical Society, 1914; "Heat of Neutralization of Hydroxylamine," ibid., 1915; also other articles in scientific journals. Member: American Chemical Society; Treasurer, Wisconsin Section, American Chemical Society, 1917-19; Sigma Xi; Gamma Alpha. Biography in American Men of Science, 1921, 1927; School Calendar, 1924. Born at Nicollet, Minn., Oct. 14, 1877; father, pioneer in Nicollet County, Minn., came to the United States from Stiksrud, Ringerike, at the age of 11 years; mother (née Lökensgard) came from Hallingdal at the age of 6.

ELLINGSON, OLAF JOHN SVERDROP, C.E., University of Texas, 1906. Instructor in Drawing, University of Texas, Austin, Tex., 1907-09.

ELSTAD, LEONARD B., B.A., St. Olaf College, 1922; M.A., Gallaudet College, 1923. Instructor in English and History, Gallaudet College, Washington, D. C., 1923-25. Fellow, Department of Normal Training, Speech, and Speech-Reading, Gallaudet College, 1922-23; now Principal, Wright Oral School, New York City, one of the 3 pioneer private schools for the deaf in the United States. Born in America.

ELVEHJEM, CONRAD ARNOLD, B.S., University of Wisconsin, 1923; M.S., ibid., 1924; Ph.D., ibid., 1927. Instructor in Agricultural Chemistry, University of Wisconsin, Madison, Wis., 1925 to date. Assistant in Agricultural Chemistry, University of Wisconsin, 1923-25. Author: "Nutritional Anemia on Whole Milk Diet and the Utilization of Inorganic Iron in Hemoglobin Building" (with E. B. Hart, H. Steenbock, and J. Waddell), Journal of Biological

Chemistry, Vol. 65, 1925; "Quantitative Methods for the Determination of Iron in Biological Materials" (with E. B. Hart), ibid., Vol. 67, 1926; "The Effects of Diet on the Iron Content of Milk" (with E. B. Hart and R. C. Herrin), ibid., Vol. 71, 1927; "The Iron Content of Animal Tissues" (with W. H. Peterson), ibid., Vol. 74, 1927; "Coffee as a Supplement to Iron for Hemoglobin Building in the Rat" (with E. B. Hart, H. Steenbock, and J. Waddell), ibid., Vol. 77, 1928; "The Iron Content of Plant and Animal Foods" (with W. H. Peterson), ibid., Vol. 78, 1928; "The Determination of Coffee in Biological Materials" (with C. W. Lindaw), ibid., Vol. 81, 1929; "Nutritional Anemia on Whole Milk Diet and Its Correction with the Ash of Certain Plant and Animal Tissues or with Soluble Iron Salts" (with E. B. Hart, J. Waddell, and H. Steenbock); also many other research papers dealing with the factors in our diet effecting the cure or prevention of Anemia. Member: American Association for the Advancement of Science; Sigma Xi; Phi Sigma; Phi Lambda Upsilon; Alpha Zeta. Born at McFarland, Wis., May 27, 1901; parents came from Sogn.

ELVIKEN, ANDREAS, Cand. Mag., University of Oslo, 1921; University Fellow, Columbia University, 1926-27; Ph.D., University of Berlin, 1929. Professor of History, Temple University, Philadelphia, Pa., 1929—. Teacher of Norwegian, St. Olaf College, 1922-24; Instructor in Modern European and English History, West Virginia University, 1924-26; Fellow in History, Columbia University, 1926-27; Instructor in History, Columbia University, 1927-28; Study in Germany, 1928-29. Author: Die Entwicklung des norwegischen Nationalismus (doctoral dissertation), Emil Ebering, Berlin, 1930 (a book which has been widely reviewed); "The Genesis of Norwegian Nationalism," Journal of Modern History (the leading journal in its field in this country), Sept. 1931. Member:

American Historical Association; American Association of University Professors. **Born** in Norderhov, Ringerike, April 1, 1898.

ENGER, ARTHUR LUDWIG. B.S., University of Illinois, 1911; C.E., *ibid.*, 1916. Assistant Professor of Irrigation Engineering, and Assistant Irrigation Engineer, Agricultural Experiment Station, Agricultural Experiment Station, University of Arizona, Tucson, Ariz., 1912-17. Instructor in High-way Engineering, Polytechnic In-stitute of Brooklyn, 1911-12; Cap-tain of Engineers, U. S. Army, 1917-19; Structural Engineer, Sheehan-North Company, El Paso, Tex., 1919-20; Structural Engineer, Barglebaugh & Whitson, El Paso, Tex., 1920-22; Practising Architect, El Paso, Tex., 1922-23; Assistant Structural Engineer, Build sistant Structural Engineer, Building Department, City of Los Angeles, Calif., 1923-24; Structural Engineer, Bridge Division, Engineering Department, City of Los Angeles, 1924-25; Bridge Architect, same, 1925-27. Member: Sigma Xi; Tau Beta Pi; Associate member, American Society of Civil Engineers. Biography in Who's Who in Engineering, 1925. Born in Decorah, Iowa, June 18, 1886; father, the sistant Structural Engineer, Build-Iowa, June 18, 1886; father, the late Hon. Lauritz M. Enger, sometime Member of the House of Representatives of Iowa, and later State Senator, came from Sigdal, near Drammen; mother's parents (Myran), also from Sigdal; brother of Prof. M. L. Enger (q. v.).

ENGER, MELVIN LORENIUS, B.S., in C.E., University of Illinois, 1906; C.E., ibid., 1911; M.S., ibid., 1916. Professor of Mechanics and Hydraulics and Head of the Department of Theoretical and Applied Mechanics, University of Illinois, Urbana, Ill., 1918 to date. Instructor in Theoretical and Applied Mechanics, University of Illinois, 1907-09; Associate, same, 1909-11; Assistant Professor, same, 1911-15; Assistant Professor of Mechanics and Hydraulics, same, 1915-17; Associate Professor of Mechanics and Hydraulics, same, 1917-18. Author: The Resistance to Flow Through Locomotive Water

Columns (with Arthur N. Talbot), University of Illinois Engineering Experiment Station Bull. 48, 1911; Hydraulic Experiments with Valves, Orifices, Hose, Nozzles, and Orifice Buckets (with others), U. of Ill. Engr. Exp. Sta. Bull. No. 105, 1918; also numerous articles in technical journals. Member: Society for the Promotion of Engineering Education; American Water Works Association; Illinois Society of Engineers; Sigma Xi; Tau Beta Pi; Honorary member: Triangle; Sigma Tau; Mu San. Final honors, University of Illinois. Biography in University of Illinois. Biography in University of Illinois Alumni Record; American Men of Science, 1921, 1927. Born at Decorah, Iowa, May 5, 1881; brother of Prof. A. L. Enger (q. v.).

ERICKSON, ERICK ALEX-ANDER, B.A., University of Minnesota; 1st Lieutenant, Field Artillery, U. S. Army. Assistant Professor of Military Science and Tactics, University of Wisconsin, Madison, Wis., 1921-25. Officer, U. S. Army, now stationed at Honolulu, Hawaii. Winner of athletic honors. Member, Phi Delta Theta. Born in Seattle, Wash., 1891; father was born in Sweden; mother (née Torkelson) came from Christiansand S.

ERICKSON, FRANK MORTON, A.B., Wabash College, 1892; A.M., University of Chicago, 1895; Student, School of Archaeology, Athens, Greece, 1900; Austin Scholar, Graduate School, Harvard University, 1906-07; Add. Work, Leland Stanford, Jr., University, 1915. Dean of the College of Liberal Arts and Professor of Education, Willamette University, Salem, Ore., 1925 to date. Directors of the John McCornick Institute of the John McCornick I tor of the John McCormick Institue for Infectious Diseases, Chicago, Ill., 1902 to date. The McCormick Institute, affiliated with the University of Chicago, was founded in 1902 for the study and treatment of scarlet fever and other infectious diseases. In addition to conducting investigative work, the Institute has a small hospital, known as the Durand Hospital. It houses the American Type Culture Collection, which is managed by a representative committee of bacteriologists and microbiologists. Scientific contributions of significance have come from the Institute since its beginning. It was there that scarlet fever was studied by George F. Dick and Gladys H. Dick; their work has resulted in a practical test by means of which it can be determined whether a person is or is not susceptible to scarlet fever, and in a method of making the susceptible person insusceptible, that is, in a method of preventing scarlet fever, as well as in an antitoxic serum for the treatment of scarlet fever. The Institute also publishes the Journal of Infectious Diseases, now (in 1931) in its 46th volume, and the Journal of Preventive Medicine, now in its 5th volume. Among other positions held by Dr. Hektoen are the following: Lecturer on Pathological Anatomy and Histology, and Curator of the Museum, Rush Medical College, Chicago, 1890-92; Professor of Pathology, College of Physicians and Surgeons (now University of Illinois College of Medicine), Chicago, 1892-94; Pro-fessor of Morbid Anatomy, Rush Medical College, 1895-98; Professor of Pathology, Rush Medical College, 1898 to date; Professor of Pathology, Woman's Medical School, Chicago, 1891-97; Professor and Head of the Department of Pathology, University of Chicago, 1901 to date. Also Pathologist to Cook County Hospital, Chicago, 1889-1903; Physician to the Coroner's

Office, Chicago, 1890-94; Member of Illinois Commission to Investigate Occupational Diseases, 1909-11; Consultant, U. S. Public Health Service, 1926 to date. Author: Post-Mortem Technique, Chicago, 1894; Introduction to the Study of Infectious Diseases, in the Osler-McCrae System of Medicine, Lea & Febiger, Philadelphia, 1927; articles on Dr. John Martin Kalberlahn, the first Norwegian medical practitioner in America, and on health conditions and the practice of medicine among the early Norwegian settlers (with Dr. Knut Gjerset), in Studies and Records, Publications of the Norwegian-American Historical Association, Vol. 1, 1926; also more than 200 papers on pathology, bacteriology, and immunology published in representative scientific journals of the United States and Europe. Contributor to and co-editor of American Text-Book of Pathology, Saunders Company, Philadelphia, 1901. Editor: Durck's Pathologic Histology, Saunders Company, Philadelphia, 1902; Contributions to Medical Science by Howard T. Ricketts, University of Chicago Press, 1911; Colsity of Chicago Press, 1911; Collected Works of Christian Fenger, 2 vols., Saunders Company, Philadelphia; Editor, Journal of Infectious Diseases, 1904 to date; Editor-in-Chief, Archives of Pathology, since 1926. Middleton-Goldsmith Lecturer, New York Pathological Society, 1906; Lecturer Horney Society, New 1906; Lecturer, Harvey Society, New York, 1910; Herter Lecturer, New York University—Bellevue Hospital Medical College, 1912; Cutter Lec-turer, Harvard Medical School, 1917; Jones Lecturer, University of Oregon, 1920. Among his contributions to medical science are the following: The demonstration by human experiments that the cause of measles is present in the blood of the patient in the acute stage of the attack; a pioneer study of bacterial cultures of the blood during life in certain human infectious diseases; a suggestion that, in order to make transfusion of blood a safe procedure, preliminary tests for blood compatibility should be made and the donor selected accordingly, which is now a universal practice; and more recent studies of the so-called immune reactions, with

the result, among others, of improvement in the biologic test for blood for medico-legal purposes. He has been the teacher of many medical men of distinction; has held and holds now positions of trust in various scientific and charitable organizations. "He has been an enormous and indefatigable worker all his life, having given up many of the ordinary social diversions to devote his days and nights to the progress of science." Clinical Medicine, Jan. 1926. Listed as "a distinguished American pathologist" in the New International Encyclopedia. Classed as one of the leading American pathologists in American Men of Science since its first ed. of 1906. "One of the most eminent pathologists and bacteriologists in our country. * * * He has done much valuable work in experimental medi-cine." Garrison's *History of Medicine*, 1929. "Dr. Aven Nelson is a teacher and an investigator of the first rank in botanical science. * * * In a period of forty years' service at the University of Wyoming he has constantly carried a heavy burden of teaching and has earned the respect and admiration of many hundreds of students. In addition to curricular and faculty burdens that would have occupied the entire time of most men, Dr. Nelson has made opportunity to do a large amount of exploration and original research work. He has developed, at the University of Wyoming, one of the largest and most valuable collections of Rocky Mountain plants in existence. Not the least of his services to the cause of higher education and the advancement of knowledge came during the five years when he served the University of Wyoming

honorably and efficiently as president. Last June (1926) the University of Colorado recognized his achievements by conferring upon him the honorary degree of Doctor of Science. In the community where Dr. Nelson has lived and worked for forty years he has earned a reputation for consistently championing the causes of truth, justice and honor and for conducting himself at all times as the Christian gentleman that he is." Dr. Edwin Blake Payson, Professor of Botany, University of Wyoming, written in the spring of 1927. "May 13, 1929, a dinner was given in his honor by the board of trustees, the members of the faculty, and the administrative staff of the university on the occasion of the completion of his seventieth year of life and forty-second in the service of the university." Born in Oslo, Norway, Sept. 26, 1867; brought to New York City by parents in 1871; died (after a short illness from typhoid

fever) at St. Luke's Hospital, New York City, Oct. 28, 1900; funeral service attended by the entire faculty of the College of the City of New York; tablet to his memory placed in the new buildings of this college; son, Conrad Harold Nordby, is an architect of Reading, Pa. "To those acquainted with him, no written words can represent the charm of his personality or give anything approaching an adequate impression of his ability and strength of character. * * * He was a teacher who impressed his personality, not only upon his students, but upon all who knew him. In his character were united force and refinement, firmness and geniality. In his earnest work with his pupils, in his lectures to the teachers of the New York Public Schools and to other audiences, in his personal influence upon all with whom he came in contact, he spread the taste for beauty, both of poetry and of life. When his body was carried to the grave, the grief was not confined to a few intimate friends; all who had known him felt that something noble and beautiful had vanished from their lives." L. F. M. (a former colleague of Nordbye at the College of the City of New York), in The Influence of Old Norse Literature upon English Literature. "If I wished to set before my boy a type of what is best and most lovable in the American youth, I think I could find no more admirable character than that of Conrad Hjalmar Nordby. * * * Of such youth our land may well be proud; and no man need speak despairingly of a nation whose life and institutions can ripen such a fruit." Rev. John Coleman Adams, at memorial service held in the Church of the Puritans. (Acknowledgment gratefully made of information received in connection with this sketch from Professor Charles A. Downer, of the College of the City of New York, from Mrs. Wiliam R. McCord, of Harrisburg, Pa. [formerly Mrs. Conrad Hjalmar Nordby], and from Professor Robert Herndon Fife, of Columbia Universitv.)

The influence of President Olson at the University of South Dakota is indicated by the following: During the academic vear of 1885-86 the entire university had 7 instructors; during 1889-90 the number had risen to 24; during 1891-92 the number had dropped to 14, with 1 to be supplied. During 1885-86 the students enrolled in the Collegiate Department numbered 12; during 1889-90 there were 56. During 1885-86 the total number of students registered at the university was 195; during 1889-90 the number was 476; in 1891-92 it was 251 (figures taken from the university catalogs for the respective years). Biography in Strand's History of the Norwegians of Illinois, Chicago, 1905; Catalog of the University of South Dakota for 1889-90. Born at Veldre, Ringsaker, Aug. 29, 1847; came with father, Ingebret Olsen Stigen, and mother to a farm near La Crosse, Wis., 1858; brother of the late General S. E. Olsen, prominent merchant of Minneapolis inent merchant of Minneapolis, Member of the Staff of the Governor of Minnesota, 1889-99. The Catalog of the University of South Dakota for 1889-90 contains the following: "In MEMORI-AM. Edward Olson, M.A., Ph.D. President of the University of Da-kota—1887-1889. Edward Olson was At eleven years of age he came to America, his father settling on a farm in Wisconsin. At eighteen the ambition for education possessed him and he entered the area. sessed him, and he entered the preparatory department of Beloit College, Wisconsin, in 1866. In 1869 he entered the Freshman class in the University of Chicago, where he was graduated with the highest

honors in 1873. The two succeeding years were spent in study in Germany and France, where he acquired a thorough familiarity with the languages of those countries, in addition to his theological and philosophical studies. In 1876 he was graduated at the Union Theological Seminary in Chicago, Having chosen teaching as his life work, he became Professor of the Mod-ern Languages in the University of Chicago. Greek was his favorite study, however, and after a second European trip, during which he visited Greece, he succeeded Dr. Boise in the Greek Chair at the University. When the University closed its doors because of financial embarrassments, he was called to a position in the Theological Seminary, and was called thence to the Presidency of the University of Dakota in 1887. In the full success of an educational work of the highest importance to South Dakota and the Northwest, he was suddenly stricken down. Visiting his brother in Minneapolis at the Thanksgiving season, he was among those caught by the fire in the Tribune building on the night of November 30, 1889, and while descending the fire escape was thrown to the ground and instantly killed. President Olson was remarkable in personality and scholarship. He was a natural leader as well as a born teacher. His energy and enthusiasm were contagious. His character was Christian, inspiring and uplifting. His work for the University will be lasting in its results. The rapid progress made in the brief period of his administration is in many respects without parallel in educational annals. He was the founder of the institution in its present character and scope. He placed its Collegiate Department upon the highest plane, created a Faculty zealous, able, and devoted, and gathered a body of nearly five hundred students, impressing upon the entire institution his own noble, generous, and scholarly spirit. He well illustrated the lesson which he learned from the life and teaching of the Great Teacher, 'The Dignity of

Service, and the Nobility of Sacrifice."

RANUM, ARTHUR, A.B., University of Minnesota, 1892; Graduate Work, Cornell University, 1893-96; Ph.D., University of Chicago, 1906. Professor of Mathematics, Cornell University, Ithaca, N. Y., 1923 to date. Fellow, Cornell University, 1895-96; Fellow, University of Chicago, 1896-97; Professor of Mathematics and Astronomy, University of Washing-

ton (Seattle), 1897-1904; Instructor in Mathematics, University of Wisconsin, 1904-05; Assistant in Mathematics, Leland Stanford, Jr., University, 1905-06; Instructor in Mathematics, Cornell University, 1906-10; Assistant Professor of Mathematics, same, 1910-23; Professor of Mathematics, University of Chicago, Summer 1916. Author: "The Group of Classes of Congruent Matrices with Application to the Group of Ismorphisms of Any Abelian Group" (thesis for Ph.D.), University of Chicago, 1906; "On the Relation of Mathematics to Engineering," in R. P. Baker's Engineering Education, J. Wiley & Sons, New York, 1919; also more than 30 papers on subjects related to Geometry and other branches of Mathematics published in mathematical journals of America and Europe. Associate Editor, Bulletin of the American Mathematical Society, 1909-13; Associate Editor, Transactions of the American Mathematical Society, 1913-19. Member: American Mathematical Society; Phi Beta Kappa; Circolo Matematico de Palermo; Fellow, American Association for the Advancement of Science. Biography in Who's Who in America; American Men of Science (classed as one of the 80 leading American mathematicians since 1910 ed.); Who's Who in American Education, 1930; Who's Who in the East, 1930. Born in La Crosse, Wis., Dec. 13, 1870; father, Ingebrigt Ranum, came from Trondheim; mother, Elise (Myhren) R., from Helgeland.

RASK, OLAF SELMER, B.A., University of Minnesota, 1916; B.S., ibid., 1917; Ph.D., Stanford University, 1923. Associate Professor of Chemistry, Johns Hopkins University, Baltimore, Md., 1928—. Associate Chemist, U. S. Department of Agriculture, 1917-21; Graduate Work, University of Minnesota, 1921-22; Fellow, Stanford University, 1922-23; Associate in Chemistry, Johns Hopkins University, 1923-28. Research worker in the field of cereal foods. Author of many articles in scientific journals. Member: American Chemical

Society; American Association for the Advancement of Science. Biography in American Men of Science, 1927. Born at Hendrum, Minn., March 30, 1891; father, H. J. Rask (d. 1929), prominent farmer of Hendrum, Minn., and later of Kalispell, Mont., was born in Hallingdal; mother, Ellen (Spande) R., also Norwegian.

RASMUSEN, JESSE EPHRA-IM, B.S., Valparaiso University, 1901; B.S. in M.E., Purdue University, 1907; M.E., Purdue University, 1911. Professor of Engineering Drawing, University of Nebraska, Lincoln, Neb., 1918-20. Instructor in Applied Mechanics, University of Nebraska, 1907-08; Adjunct Professor of Applied Mechanics and Machine Design, same, 1908-11; Associate Professor of Engineering Drawing, same, 1914-18; Vice-President and General Manager, Baker Ice Machine Company of Texas, Fort Worth, Tex., 1921 to date. Born in La Salle County, Ill.; father came from Haugesund; mother, from Stavanger; a cousin was a Member of the Norwegian Storthing.

RASMUSSEN, INGEBORG, M.D., Woman's Medical School, Northwestern University, 1892. Clinical Assistant to the Chair of Diseases of the Chest, Nose, and Throat, later Instructor in Clinical Laryngology and Superintendent of the Clinic, Woman's Medical School, Northwestern University, Chicago, Ill., 1892-1902; Clinical Assistant and Instructor in Obstetrics and Gynecology, Rush Medical College, Chicago, 1902-12. Physician, Chicago, since 1892; Attending Gynecologist, Tabitha Hospital (now the Norwegian-American Hospital), 8 years; Attending Gynecologist, Mary Thompson Hospital, 3 years. Editor of "Woman's Page" in Skandinaven, 1911 to date. Correspondent of various European newspapers. Translator of various books and articles from French, German, English, and Scandinavian. Has

collected a large amount of material now in the process of preparation for publication. Member: Chicago Medical Society, for almost 30 years; Scandinavian Medical Society, Chicago; Charter member, Medical Women's Council; Co-founder, Medical Women's Club; formerly Secretary and Vice-President, Scandinavian Medical Society; Charter member, Norwegian-American Historical Association. Member of Committee on Exhibits, and State Chairman (III.) of Women's Auxiliary, Norse-American Centennial, Minneapolis, 1925. Awarded the Gold Medal of Merit by the King of Norway. Born in Bergen, April 10, 1855; came to the United States May 1, 1887.

Member: American Psychological Association: American Philosophical Association; American Association for the Advancement of Science; Psychological Corporation; American Association of University Professors; Psi Upsilon; Phi Beta Kappa. Biography in American Men of Science, 1921, 1927; Who's Who in the ence, 1921, 1927; Who's Who in the East, 1930. Born in Denver, Colo., May 21, 1882; descendant, in the 7th generation, of Karel Haensen Toll, who arrived in New York City in 1680. George S. Roberts, in his book, Old Schenectady, p. 211, referring to "Karel Haensen Toll, the first American ancestor of the Toll family," says: "* * his great-grandson arrives at the conclusion. grandson arrives at the conclusion, after long and careful investigation, that the family is of Norwegian extraction. * * * This great-grandson, Dr. D. J. Toll, in 1847, wrote a fifty-page pamphlet, in his old age, giving anecdotes and reminiscences of the family." Roberts states that Toll, apparently a sea-faring man, was captured by the Spanish off the north coast of South America, was imprisoned "probably in the fortress of Porto Cabello," escaped from his captors, swam to a ship in the nearby harbor, and was brought by it to New York in 1680. A few years later Toll "arrived in Schenectady with no other capital than a sound body and mind; a great deal of that 'stuff' which made the old Norsemen from whom he was descended, invincible; and * * * a determination to succeed * * *. At twenty-five, these qualities were his only possessions." At sixty, he was the owner of "nearly seven miles of valuable flats along the north bank of the Mohawk river * * * generally known as 'The Toll Place'," with a brickhouse, "next to the Sanders Mansion, the largest in Schenectady at the time it was built." He was a member of the Colonial legislature of New York, 1714-1726. The generations from

the original Toll to Dr. Charles Hansen Toll of Amherst College were as follows: Karl Haensen Toll, 1658(?)-1737; Simon Toll, 1698-?; Daniel Toll, 1751-?; Charles Hansen Toll (or Karel Hansen Toll) Toll), 1784-1869; Abel Hyde Toll, 1822-1893; Charles Hansen Toll, 1850-1901; Dr. Charles Hansen Toll of Amherst College, 1882—. Grand-father, Abel Hyde Toll, was the owner of a large farm at Baldwins-ville, near Syracuse, N. Y.; father, the late Charles Hansen Toll, was a distinguished lawyer of Denver, and served for one term as Attorney-General of the State of Colorado; brothers: Oliver Toll, officer in the Naval Aviation Corps during the World War; Roger W. Toll, Major in Ordnance Department, U. S. Army, World War, since 1921 Supt. of Rocky Mountain National Park (see Who's Who in America, since 1928-29 ed.; Who's Who Among North American Authors, 1929-30); Hon. Henry W. Toll, 1st Lieuten-ant, General Staff, World War, noted lawyer of Denver, and State Senator, Colo., 1923-31 (see International Blue Book, London, Paris, and New York, 1928; Who's Who in America, 1928-29).

Other descendants of the original Toll include: (1) His son, Capt. Daniel Toll (1691-1748), who, upon his father's death, acquired the latter's "vast fertile river flats and the pasture-land," married the daughter of Samuel Bradt, a granddaughter of Arent Andriessen Bradt, who came from Fredrikstad to New York in 1637, and was "one of the first white men to settle in Schenectady" (see Dr. Evjen's Scandinavian Immigrants in New York, and Pearson's Genealogies of the First Settlers in Schenectady); Capt. Toll was the first victim of the "Beukendaal fight" with the Indians, July 1748. (2) Daniel's son, Johannes Toll (1719-1746). (3) Johannes' son, Karel Haensen Toll (or Charles Hansen Toll) (1746-1832), who "was possessed of the family energy and of high principles; like his namesake, he was a man of unchanging determination and loyalty." (4) Karel Haenson's son, John

C. Toll (?-1848 or 1849), A.B., Union College, 1799, served as Pastor of churches at Westerlo and Middletown for 19 years, preaching in English and Dutch, and "finding congenial companionship among the professors of Union College. John's brother, Philip R. Toll (1793-1862), Captain of a company of mounted artillery in the War of 1812, which "company was selected by General Wade Hampton for headquarters guard, on account of its military excellence and its fine appearance;" physician, went west. (6) Philip's son, Isaac D. Toll, "a brilliant and distinguished general in the Mexican War * * * still living, at a great age, in the west."
(7) Phil R. Toll (1863-), born in St. Joseph County, Mich., "son of Alfred Toll, who was one of the prominent lumbermen of the west, and a native of Schenectady,"
N. Y.; upon his father's death, Phil
R. Toll "became chairman of the board of the Badger Lumber Company, the Fort Smith Lumber Company, the Central Railway of Arkansas, and the Choctaw Investment Company, besides being interested in several other corporations" (see The Americana, Biographies, 1923).

J., 1923-24; Instructor in Physics, Johns Hopkins University, 1924-26; Physicist, Department of Terrestrial Magnetism, Carnegie Institution of Washington, Washington, D. C., 1926 to date. Author of

various scientific papers published in technical journals and read before scientific bodies. With Dr. G. Breit, was the first to prove the existence of a "ceiling" or layer in the upper air, which turns radio waves back to earth instead of their passing on into space and thus rendering long-distance transmission impossible. "By ingenious devices the investigators succeeded in recording photographically these pulses and in measuring the difference in time of arrival. This enabled them to compute the effective height of the 'ceiling.' * * * Dr. Breit and Dr. Tuve are said by the Carnegie Institution to be the first to have conclusively proved its existence by experimentation." New York Times, Feb. 13, 1927, p. 14 (see also Encyclopedia Brittanica, 1929 ed., Vol. 23, p. 666). With Dr. L. R. Hafstad and O. Dahl, also physicists of the department of terrestrial magnetism, Carnegie Institution of Washington, was awarded the \$1,000.00 award of the American Association for the Advancement of Science for the outstanding paper read at its convention in Cleveland, Ohio, Jan. 1931. This paper, entitled "Experiments with High Voltage Tubes," told of new methods of combating cancer, consisting in the development of a 2,000,000-volt X-ray tube producing and developing rays which speed along at the rate of more than 184,000 miles per second (the velocity of light being 186,000 miles per second), and have a ray-force equivalent to that of \$182,000,000 worth of radium. By directing from this tube "the third radium ray, the alpha ray, the physicists may be able to shatter atoms. That step, scientists expect, will lead to the releasing of the vast energy locked up in the atom and possibly to the trans-mutation of elements." (See New York Times, Jan. 1 and 4, 1931.) Born in the United States; brother of Prof. George L. Tuve (q.v.), and of Rosemond Tuve (q.v.).

Homan in Contemporary Economic Thought, Harpers, New York, 1928. "Veblen's contribution to economics consisted in replacing the hedonistic conception of human nature by the instinct-habit psy-chology. That shift allied economics to biology rather than to mechanics. It brought new problems to the fore and relegated old problems to the background. It suggested a close working agreement between economists and the other students human behavior-historians, psychologists, anthropologists, political scientists, and sociologists. It was a service the full value of which has yet to be grasped. * * * he remains the most interesting economist of his generation, and the one who is provoking most thought in others." Wesley C.

T. Z., Berlin; Kemi, Farmaci og Terapi, Norway; Tekniske Ukeblad, Norway; Electrician, London, and other technical journals. Recognized as an outstanding metallurgist. Chief contribution to metallurgy is his development of alloys having high magnetic permeability and low hysteresis loss, that is, alloys that are easily magnetized by an electric current, and, when subjected to alternating current, show small energy loss due to reversal of the elementary magnets. His last alloy, a 50 per cent Iron-Nickel alloy, known as "Hipernik," is used extensively in Radio sets for amplifying purposes because of its extremely low hysteresis loss and high permeability. His work on Iron-Silicon alloys has added materially to man's knowledge of these important alloys, thousands of tons of which are used annually for transformers. Preliminary, Final and Special Honors at University of Illinois: awarded the Edison Medal in 1907. Member: American Institute of Mining and Metallurgical Engineers; American Institute of Electrical Engineers; American Physical Society; American Metric Association; Tau Beta Pi; Sigma Xi, Eta Kappa Nu; Heimskringla, University of Illinois; Vice-Chairman, American Institute of Electrical Engineers, Urbana, Illinois, 1911. Biography in Who's Who in Engineering; University of Illinois Alumni Directory; American Men of Science, 1921, 1927. Born at Drammen, Norway, January 30, 1884; graduated from Oslo Cathedral School in 1903.

RHODES SCHOLARS

The will of the Honorable Cecil Rhodes, of South Africa (1853-1902), provided for the establishment of three-year scholarships at Oxford University, Oxford, England, available to citizens of the British colonies, the United States of America, and Germany. The amount to which American and British colonial scholars are now entitled, under this provision, is £400 a year. Until the year 1930, each American State was entitled to have two scholars in residence at Oxford University each year. Beginning with 1930, each one of the eight districts into which the country has been divided for the purpose of awarding these scholarships, will be entitled to select four Rhodes Scholars each year. Committees of selection, composed ordinarily of leading educators, are entrusted with the selection of each scholar on the basis of (1) "his literary and scholastic attainments; (2) his fondness for and success in manly outdoor sports such as cricket, football and the like; (3) his qualities of manhood, truth, courage, devotion to duty, sympathy for and protection of the weak, kindliness, unselfishness and fellowship; and (4) his exhibition during school days of moral force of character and of instincts to lead," etc. (From the will of Cecil Rhodes.) Following is a list of persons from six American States and three nations whose qualifications and attainments have won for them this much sought and highly prized scholarship.

ANDERSON, RAYMOND W.,
—. Rhodes Scholar from the
State of Minnesota, Oxford University, about 1918. Born in the
United States; son of John P. Anderson, St. Paul, Minn.; nephew of
Prof. Andrew W. Anderson (q.v.
in the list of American educators).

BELSHEIM, EDMUND, B.A., University of North Dakota, 1927. Rhodes Scholar from the State of North Dakota, Oxford University, 1927—. At the University of North Dakota, winner of the Stockwell Prize in Oratory, 1924; Skulason Scholarship, 1924 and 1925; Honors in the North Dakota State peace oratorical contest, 1926; Class Valedictorian, 1927; represented the university in intercollegiate debating, 3 years. Traveled in Italy, Egypt, and Palestine, 1928. Biography in U. N. D. Alumni Magazine, Jan. 1928. Born in the United States; father, the late Rev. O. G. Belsheim, Pastor in Wisconsin, Minnesota, and North Dakota, 1891-1914, was born at Vang, Valdres.

EGELAND, LEIF, B.A. (Class 1), Natal University College, Pietermaritzburg, Union of South Africa, 1921; M.A. (Class 1), Natal University College, 1922; B.A. (Class 1), Oxford University, 1926; B.C.L., Oxford University, 1927. Rhodes Scholar from the Union of South Africa, Oxford University, 1924-27. Schoolmaster, Michaelhouse (High School), Balgowah, Natal, South Africa, Feb. 1923-June 1924; Don, Oxford University, 1927—Awarded the "Borain Memorial" by vote of the Masters and Scholars, Durban (South Africa) High School; winner of 2 medals, Natal University College (most successful art student); awarded the Harmsworth Law Scholarship (£300), Oxford University; elected to Official Fellowship at Brasenose College, Oxford University, June 1927; Student at the Middle Temple, London. President of the Raleigh Club, Secretary of the League of Nations' Union, and Treasurer of the International Club, Oxford University. During vacations has traveled in England,

Wales, Scotland, Norway, Sweden, Denmark, Germany, Austria, Holland, Belgium, France, and Italy. Biography in Fram (Johannesburg, South Africa), Aug. 1926. Born at "Solheim," Durban, Natal, South Africa, Jan. 1903; father, J. J. Egeland, was born at Lyngdal, near Farsund, came to Durban in 1880, at the age of 16, engaged in the timber trade, started the deep sea fishing industry in Durban, 1895, started the whaling industry in South Africa, 1908, founded the South African Whaling Co., Ltd., and the Union Whaling and Fishing Co., Ltd., of Durban, and is one of the leading captains of industry in South Africa (see South African Who's Who, 1925-26, 1929-30; Fram, Aug. 1926; and various issues of Nordmandsforbundet); mother, Ragnhild (Konsmo) E., was born at Nordre Undal, near Mandal, has been a delegate from South Africa to the International Council of Women's Quinquennial, International Council of Women's Quinquennial, International Council of Women's Outinguennial, International Council of Women Members of Peace in South Africa, Vice-President of the local N. C. W., and Vice-President of the Enfranchisement League, the Durban branch of the League of Nations' Union, and the newly-established Shakespeare Club of Durban, lecturer on literary and other subjects.

FRASER, GJEMS M., B.A., University of North Dakota, 1920;
——. Rhodes Scholar from the State of North Dakota, Oxford University, 1921-24. Superintendent of Schools, Crary, N. Dak., 1920-21; Teacher, Lake Forest (Ill.) Academy, 1924-26; Headmaster, Pembroke School, Kansas City, Mo., 1926 to date. Winner of North Dakota State Oratorical Contest. Member, Phi Beta Kappa, Delta Sigma Rho. Biography in Private Schools, 1926-27; U. N. D. Alumni Magazine, Jan. 1928. Born in America; brother of Prof. Eugenia G. Fraser (q.v. in list of American educators).

GRAVEM, AXEL BERG, Rhodes Scholar from the State of California, Oxford University, 1919-23. (See in list of American educators)

FREDERICK, HOVDE. B.A., University of Minnesota, 1929. Rhodes Scholar from the State of North Dakota, Oxford University, 1929-. "He has been an outstanding student at Minnesota where he made a 'B' average besides being one of the Gophers' outstand-ing athletes. Hovde starred as quarterback this fall and has been selected on several mid-western mythical elevens. He is affiliated with Phi Delta Theta fraternity, and is also a member of several honor societies." The Student (Uniersity of North Dakota), Dec. 11, 1928. Born in Erie, Pa., Feb. 7, 1908; brought to Devils Lake, N. Dak., at the age of 4; father, M. R. Hovde, is Chief of the U.S. Weather Bureau, Devils Lake, N. Dak.

JOHANSON, JOEL MARCUS, Rhodes Scholar from the State of Washington, Oxford University, 1904-07. (See in list of American educators)

KOREN, WILLIAM, JR., B.A., Princeton University. Rhodes Scholar from the State of New Jersey, Oxford University, 1931—. Winner of various honors at Princeton University. See John Koren and Prof. William Koren in list of American educators.

LARSEN, JAKOB AALL OTTESEN, Rhodes Scholar from the State of Iowa, Oxford University, 1911-14. (See in list of American educators)

LARSEN, THORLEIF, Rhodes Scholar from the Province of British Columbia, Canada, Oxford University, 1907-10. (See in list of American educators)

MOE, HENRY ALLEN, Rhodes Scholar from the United States at large, Oxford University, 1921-23. (See in list of American educators) NELSON, DAVID THEODORE, A.B., Luther College, 1912; A.B., Oxford University, 1917; Graduate Student, University of Chicago. Rhodes Scholar from the State of North Dakota, Oxford University, 1914-17. Principal of School, Hannaford, N. Dak., 1912-13; Relief Worker, Belgium and Northern France, Dec. 1914-Oct. 1915; Ambulance Worker, France, 1916; Captain, U. S. Army, United States and France, 1917-19; Professor of Languages and History, Luther College, 1921—. Upon special invitation, as a former relief worker with the Hon. Herbert Hoover, attended the latter's Inauguration as President of the United States, March 4, 1929. Biography in School Calendar, 1924. Born at Hillsboro, N. Dak., Sept. 10, 1891.

STROM, CARL W., A.B., Luther College, 1919; M.S., State University of Iowa, 1924; B.A., Oxford University, 1927. Rhodes Scholar from the State of Minnesota, Oxford University, 1924-27. Teacher of Mathematics, Luther College, 1919-23; Professor of Mathematics, Luther College, 1927 to date. Awarded honors of the Second Class for work in Mathematics, Oxford University. Biography in School Calendar 1924. Born at Albert Lea, Minn., Dec. 22, 1899; paternal grandfather, Christian L. Strom, came from Almunaune, Tröndelagen, in 1869; father, Rev. E. I. Strom, was Principal of Luther Academy, Albert Lea, Minn., 1897-1902, and has been Pastor at Belgrade, Red Wing, and Watson, Minn., since 1902.

TETLIE, JOSEPH, A.B., St. Olaf College, 1909; A.B., Oxford University, 1913; C.T., United Church Seminary, St. Paul, 1916. Rhodes Scholar from the State of Minnesota, Oxford University, 1910-13; Principal, Hauge Academy, Fancheng, Hupeh, China, 1919-21; Graduate Student, University of Chicago, 1923-25; Pastor, Madison, Minn., 1916-17, and 1925 to date. Biography in School Calendar, 1924; Who's Who Among Pastors, 1928. Born in Dickson County, Neb., May 18, 1888; father, the late Rev. Paul H. Tetlie, was born at Skogn, Indherred.

TITLESTAD, RICO MARTIN, Rhodes Scholar from the Union of South Africa, Oxford University, 1922-25. (See in list of world educators.)

TITLESTAD, VICTOR ALBERT, B.A., Natal University College, Pietermaritzburg, South Africa, 1923; Diploma in Education, Natal University College, 1924. Rhodes Scholar from the Union of South Africa, Oxford University, 1927—. Teacher in Durban and Pietermaritzburg, Natal, South Africa, 1924-27. Born in South Africa; brother of R. M. Titlestad (q.v. in list of world educators); cousins: Karl M. Titlestad, Principal of Umpumulo Native College, Mapumulo, Natal, South Africa; Gunvald M. Titlestad, Teacher at Umpumulo Native College (both being the sons of Rev. L. M. Titlestad); brother, S. E. Titlestad, is gradually taking over his father's extensive business; sister took her matriculation examination in 1927.

WORLD EDUCATORS

AMUNDSEN, E D W A R D OTTO, B.S., University of California, 1912. Profesor of Horticulture, University of South Africa, 1921-23. Instructor in Agricultural Extension, University of California, East Auburn, Calif., 1917-20; Specialist in Agricultural Extension, University of California, 1920-21; Manager, Growers' Service Department, Newcastle (Calif.) Fruit Growers Association, 1924—Member: Delta Sigma Phi, Alpha Zeta. Biography in Rus, 1918, 1920, 1925, 1930. Born in the United States; son of O. and Anna (Staven) Amundsen.

"Madame Hanka Petzold was honored by her former pupils and graduates in a very interesting program of music at the Seinenkan before a very large audience of friends and admirers. For fifteen years Madame Petzold guided the musical footsteps of hundreds of pupils at the Ueno Academy of Music, many of them becoming well-known in the musical life of Japan today. * * * She is still taking an active part in musical life and has a large group of devoted pupils who come to her home in Azabu. In grateful recognition of her devoted work and her unfail-ing enthusiasm and help, these pupils have formed the 'Nadeshko Society' the plan of which is to hold an annual concert in honor of their teacher and friend. Saturday's concert was the first to be given under this plan. * * * that it was a success was attested to by the abundant enthusiasm displayed and the excellence of the music performed. At the close of the concert Madame Petzold received many bouquets of beautiful flowers and the hearty and sincere congratulations from all her former and

present pupils who attended and form a host of her friends, many of whom she has known ever since she first came to Japan nearly twenty years ago." The Japan Advertiser, Tokyo, Feb. 28, 1928. "On Saturday afternoon, February 25, the large auditorium of the Seinenkan was filled to overflowing by friends and admirers of Professor Hanka Petzold. * * * the great popularity of Madame Petzold speaks for itself. This lady who is em-bodied music, was for 15 years the presiding feminine genius of the Ueno Academy and an uncalculatel moral force in that institution.

* * * Some of them (her pupils) have since become noted in America and Europe * * *. The concert proceeded to its end punctuated by unstinted applause, an enormous success, both socially and artistically. It has been the custom for some years for the pupils to arrange an honor-benefit for Madame Petzold, but this was in many ways the best yet given, with more enthusiasm, rising to a veritable crescendo of elan." Japan Advertiser, March 4, 1928. See also ibid., Nov. 22, 1927. HISTORICAL AND OTHER NOTES

FIRSTS

The first Norwegian-born student at an American college of whom the present investigator has found any trace, was "Hans Hendrickson, Norway," listed as a member of the Sophomore class of Beloit College in 1852-1853, the first class of that college having been graduated in 1851; Hans Hendrickson was a member of the Junior class of that college in 1853-1854, and of the Senior class in 1854-1855, when he died.

The two first persons born in Norway to take the degree of Doctor of Philosophy at any American university were Dean Magnus C. Ihlseng, who took his Ph.D. at Columbia University in 1877 (which was the third year in which Columbia University conferred this degree), and the late Dr. Anton B. Sander, who took his Ph.D. at Yale University Conferred this degree of Doctor of Philosophy and the late Dr. Anton B. Sander, who took his Ph.D. at Yale University Conferred the Conferred Conferr

sity in 1877.

The three first Norwegian-Americans to take their Doctor of Philosophy degree at Yale University were Anton B. Sander, Ph.D., 1877; Thorstein B. Veblen, Ph.D., 1884; and Olaus Dahl, Ph.D., 1889.

The three first Norwegian-Americans to take their Doctor of Philosophy degree at Columbia University were Magnus C. Ihlseng, Ph.D., 1877; George T. Flom, Ph.D., 1899; and Charles E. Stangeland, Ph.D., 1904.

The first Norwegian-American to take an advanced degree at Harvard University appears to have been President Aven Nelson, who took his Master of Arts degree there in 1892. And the first Norwegian-born person to take his Doctor of Philosophy degree at Harvard appears to have been Professor Andrew R. Anderson, who took it in 1903.

The eight (?) first Norwegian-Americans to take their Doctor of Philosophy degree at the University of Minnesota were Nils Flaten, Ph.D., 1900; Adolph O. Eliason (?), Ph.D., 1901; Elias Rachie, Ph.D., 1901; Thomas Geisness, Ph.D., 1902; Paul M. Glasoe, Ph.D., 1902; Henry A. Erikson, Ph.D., 1908; Olaf Morgan Norlie, Ph.D., 1908; and Gustav O. Brohaugh, Ph.D., 1909.

In June, 1929, the School of Education of the University of North Dakota conferred its first Doctor of Philosophy degree upon J. Fred-

erick Weltzin (q. v.), of Mayville, North Dakota.

Special efforts have been made to find traces of educators descended from the Norwegian immigrants who settled in the States of New York, Delaware, Pennsylvania, and North Carolina from 1630 to 1762. A number of Hagens, Holters, and others in Pennsylvania and elsewhere state that family tradition has it that their ancestors originally came from Norway. However, they are not in a position at this time to vouch for the accuracy of this tradition, and as their families have lived in the United States for many generations, the biographies of these educators have not been included in this work. There is one professor, however, whose Norwegian ancestor arrived in the city of New York in 1680, whose biography is given herein because of the interest attaching to the family history.

So far as the present investigation has disclosed, the first person of Norwegian ancestry to serve as Instructor in an American university was the Hon. Rasmus B. Anderson, appointed Instructor in Languages at the University of Wisconsin in 1869. It seems a remarkable fact, and one which testifies to the sturdiness of the race, that the first Instructor,

Professor Anderson, is still living and active.

The first person born in Norway to be appointed Instructor in an American college or university was the late Professor Peter Hendrickson, who was appointed Instructor in Greek at Beloit College in 1870; he was the first person of Norwegian stock to be appointed full Professor at an American college or university, appointed Professor of Modern Languages at Beloit (Wisconsin) College in 1871.

The first Norwegian-born educator to serve as Dean was Dr. Magnus C. Ihlseng, who became Dean of the School of Mines at Pennsyl-

nus C. Iniseng, who became Dean of the School of Milles at Tennsylvania State College in 1893.

The first Norwegian immigrant lad to become President of an American university was Dr. Edward Olson, whose term as President of the University of South Dakota began in 1887.

The first man born in Norway to become President of an American State agricultural college was Dr. John A. Widtsoe, who became President of the Agricultural College of Utah in 1907; he was the second Norwegian-born person to become President of an American State university, the University of Utah, in 1916.

The first American-born educator of Norwegian parentage to become President of an American State university was Dr. Aven Nelson, who became President of the University of Wyoming in 1917, after having

Served as Acting President for five years.

The first Norwegian-born educator to become President of an American municipal university was Dr. Harold W. Foght, who became President of the University of Wichita in 1927, after having served for eight years as President of a leading teachers college, being also the first person born in Norway to become President of an American State teachers college.

The two first books by Norwegian-Americans published in this country were R. B. Anderson's America Not Discovered by Columbus and

H. H. Boyesen's Gunnar, both published in book form in 1874.

NORWEGIAN-AMERICAN COLLEGES

The desire for an education on the part of the Norwegian pioneers found expression to some extent in the establishment of academies and colleges of their own. Luther College was founded as early as 1861. This was the year of the founding of Massachusetts Institute of Technology. It was six years before the founding of the University of Illinois. Its founding preceded that of Ohio State University by twelve years; University of South Dakota by twenty-one years; and the University of Montana by thirty-four years. Its founding preceded that of twenty-four of our present State universities, while the States of Connecticut, Massachusetts, New Jersey, and Rhode Island have not established State universities to this day, although Rutgers University is gradually coming to be regarded as a State university. The founding of Luther College preceded that of 368 out of the 581 leading colleges and universities listed in the World Almanac for 1928. It has an annual enrollment of about 400 students; an examination of Who's Who in America reveals the fact that

its alumni include not a few men of eminence.

St. Olaf College was founded in 1874; this was before the founding of the Universities of Arizona, Colorado, Idaho, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, and Texas, and thirty-one years before the founding of the University of Florida. In 1915, this college was approved by the North Central Association of Colleges and Secondary Schools; in 1927, it was approved by the American Association of University Women; and in 1930, it was placed on the accepted list of colleges of the Association of American Universities. It has an annual enrollment of about 1,000 students, a faculty whose services are sought by leading American institutions, and a list of 2,180 living graduates (in 1927), who are serving as professors in leading American universities, as research workers in scientific institutions, or filling positions of importance in thirty-five American States, in Alaska, the District of Columbia, Canada, France, Madagascar, India, Burma, China, and the Philippine Islands.

There are also various other colleges, such as Augsburg College, Minneapolis, Minnesota, whose alumni include a number of men internationally known in various fields; Augustana College, Sioux Falls, South Dakota, whose work has recently attracted nation-wide attention; and Concordia College, Moorhead, Minnesota, with an enrollment (in 1928-29) of about 450 students from six American States and several foreign countries; the President, Dr. J. N. Brown, was elected President of the American Association of Colleges at its annual meeting in Chat-

tanooga, Tennessee, January, 1929.
While on the subject of private schools, it should be noted that of the 975 different universities, colleges, and professional schools reported on by the United States Bureau of Education for the year 1925-26, only 154 were under public control, while the remaining 821 were under

private control.

The Norwegian people in America, chiefly farmers, recently raised a sum of almost three million dollars for the endowment of the five colleges above named. In addition, they maintain about twenty junior colleges, academies, seminaries, and schools in various parts of the United States and Canada; they pay taxes for the upkeep of the tax-supported elementary schools, high schools, normal schools, agricultural and technical colleges, and State universities; and they pay out each year vast sums of money for tuition in State institutions, which they attend in such large numbers as often to form a very considerable percentage of the entire enrollment.

DONATIONS TO PUBLIC INSTITUTIONS

The desire on the part of the Norwegian people to aid and promote

The desire on the part of the Norwegian people to aid and promote education and scientific research is illustrated by the following:

The first loan fund for the aid of needy students established at the University of Wisconsin was donated by the late John A. Johnson (Gisholt), of Madison, Wisconsin, in 1878; the principal now amounts to about \$25,000, and is "the mainstay" of the funds administered by the faculty Committee on Loans of that university.

About 1910, Simon Benson of Portland, Oregon (see Who's Who in America), donated to the Board of Education of Portland the sum of \$100,000 for the establishment of a technical high school in that city.

In 1913, Frederick Engen, formerly of Grafton, North Dakota, bequeathed the sum of \$100,000 to the University of Saskatchewan, Canada, for the endowment of a chair of natural science and for independent scientific research.

In March, 1912, Peter W. Severson of Portland, Oregon, donated to

Willamette University of Salem, Oregon, the sum of \$100,000.

The largest part of the \$300,000 estate of the late Torger G. Thompson, of Deerfield, Wisconsin, is understood to have been willed to the

University of Wisconsin.

The late Victor Fremont Lawson, publisher of the Chicago Daily News and co-founder of the Associated Press (son of Iver Larson Boe from Voss), bequeathed the sum of \$350,000 to Berea (Kentucky) College, Northland College, Wheaton (Illinois) College, Yankton College, Chicago Theological Seminary, and two other institutions, and his total specific bequests for benevolent purposes aggregated \$2,205,000.

NORWEGIAN CONTRIBUTION TO SCIENCE

In 1914, there was published in London a work entitled Who's Who in Science—International, containing biographical sketches of more than 9,000 scientists in all parts of the world. The "British element" in the 9,000 scientists in all parts of the world. The "British element" in the book, according to its editor, "constitutes less than a quarter of the whole." In the grouping of the scientists according to their respective countries Dr. Ivar C. Bang (q.v.) is listed under Sweden; Dr. Mentz Krogh (q.v.) is listed under Argentina; Dr. Vilhelm Bjerknes (q.v.) and Dr. Embrik Strand (q.v.) are grouped under Germany; ten of the American scientists are of Norwegian birth or ancestry, and 250 other "Americans" were born in foreign countries. Taking the figures exactly as given in the book however leaving out of scalaulation the gratest according to the in the book, however, leaving out of calculation the entire colored population of the United States as of 1910, and basing the calculation with respect to each of the twenty-five nations or geographical divisions upon the population statistics for the year nearest the period of 1912-14, the following situation is revealed:

For each million of her population Africa had .6 (six tenths) of a New Zealand) 25; Austria-Hungary 9.25; Belgium 12; Bulgaria 3; Canada 21; Denmark and Iceland 34; France 12.50; Germany 20.50; Great Britain 38; Holland 28; Italy 7; Norway 70.67; Portugal 8; Russia and Finland .79 (almost four-fifths); Servia .67; South and Central America .86 (almost nine-tenths of a scientist); Spain almost 3; Sweden 22.50; Switzer-land 56.67; United States 19.67; while out of her entire population Roumanic had 8 escientists listed Graces had 2 the inland of Malta 1 Poland mania had 8 scientists listed, Greece had 2, the island of Malta 1, Poland

and the other countries not named, none.

From these figures it appears that Norway had, in proportion to population, almost twice as many as Great Britain; more than three times as many as Sweden; three and one-half times as many as Germany and the United States; almost six times as many as France; ten times as many as Italy; and 88 times as many as Russia.

The reader will compare above figures with those found on page 1131 of the 1927 edition of American Men of Science, which latter figures appear to have been based on population statistics for a year closer to 1920 than to 1910.

WHO'S WHO IN AMERICA

Who's Who in America contains biographical sketches of the best known and the most eminent men and women of the United States. Below is the number of Norwegian-born persons whose biographies have appeared in its various editions:

1899-00 9	1906-07 18	1912-13 30	1918-19 39	1924-25 .48
1901-02 11	1908-09 22	1914-15 35	1920-21 43	1926-27 54
1903-05 12	1910-11 27	1916-17 36	1922-23 45	1928-29 60

While those listed in the 1928-29 edition, born in Norway, number 60, the present writer knows that at least 178 of those listed in that edition are of Norwegian origin, and there are fourteen others who, upon investigation, might be found to be of similar origin.

Comparing the record of Norway with that of one southern country, Italy, and with one northern country, Poland, both of which have claimed a considerable part of the attention of the world for a number of years, it is found that while each 100,000 of the Italian-born residents of the United States contributed 4.26 of the persons listed in the 1924-25 edition of Who's Who in America, and while each 100,000 of those born in Poland contributed 3.25, each 100,000 of those born in Norway contributed almost 14, or three times as many as the Italians, and four times as many as the Poles.

Comparing the record with that of native-born Americans, it is found that the 363,862 men and women who were born in Norway and resided in the United States in 1920, contributed exactly the same number of the eminent men and women listed in the 1926-27 edition as the 3,995,935 men and women of the six States of Arizona, Idaho, New Mexico, North Dakota, Oklahoma, and Wyoming combined, or 54. This means that while each 100,000 persons of those six American States contributed one and one-third person listed, each 100,000 born in Norway contributed 15.

PART IN WORLD EDUCATION

From Greenland and Alaska in the North to South Africa, Tasmania, and Argentina in the South, the Norwegian people have played a noteworthy part in the education of mankind. The first director of a normal school in Greenland was Hans P. Egede, who served as such from 1736 to 1746, and wrote the first book on the natural history of Greenland, published in 1729. His son, Paul H. Egede, wrote the first grammar and dictionary of the Eskimo language. A descendant of his is now serving as assistant professor of Romance languages at the University of Minnesota (see Dr. Elizabeth Nissen). Levine Henrietta Samuelson, whose parents came from the vicinity of Mandal to South Africa in 1851, served as teacher in the schools of Zululand and Natal from 1878 to 1917, wrote the first book on Zulu folk-lore ever written, Some Zulu Customs and Folk-lore, published in 1912, translated two books for use in native schools, and was a member of the Zulu Orthography Conference, composed of some of the greatest Zulu scholars, in 1905 and 1907 (see South African Who's Who, 1912 edition.) Her brother, the late Hon, S. O. Samuelson, understood the Zulu language and people as perhaps no other living man, taught Zulu in the Durban High School, was interpreter to the Supreme Court of Natal, and later held the important position of Under Secretary for Native Affairs in the province of Natal (see the Natal Witness, 1913). His brother, Robert C. Samuelson, attorney and advocate of the Supreme

Court of Natal since 1885, was interpreter to king Cetywayo, defended his son, chief Dinuzulu, during the famous trial at Greytown in 1908, and wrote the best grammar of the Zulu language in existence, the Robert Samuelson Zulu Grammar, published in 1925; wrote also the best Zulu-English dictionary, the King Cetywayo Zulu Dictionary of more than 1,000 pages, on which he labored for forty-five years; his last book, Long, Long Ago, published in 1929, contains his reminiscences and a practically complete account of the Zulu people (see South African Who's Who, 1929-30).

A Norwegian-American is serving as professor at the Alaska Agricultural College (see L. O. Jacobson). A Norwegian-African, Ernest Riem, is on the staff of the Technical College in Durban, South Africa. And a Norwegian-Australian is professor at the University of Tasmania (see T. Hytten). For those having taught at universities and other institutions in China and Hawaii, see Braafladt, Braastad, Helen L. Gunderson, Neprud, Garman, Christophersen, Nelsen, Harold S. Palmer, Francis Peterson, and Wist in the list of American Educators. For professors in universities in other parts of the world, see the list of World Educators.

Evelyn Stibolt, of Oslo, is giving demonstration in household arts at the Ecole Normale in Corca, Albania. Oscar Nero, of one of the Northwestern States, is the headmaster of the Umhlaugeni Government School, Natal, South Africa. Dr. Melvin A. Helland is the head of a normal school in Madagascar; his brother, Bernhard A. Helland, is the headmaster of a higher school for boys in India; their sister, Mrs. Ralph Mortensen, is doing educational work in China; and their father, Professor Andreas Helland, is on the teaching staff of a college in Minneapolis. A large number of men and women have taught or are now teaching in high schools of Hawaii. Others have been in educational work in the Philippine Islands. And the man who during the last ten years has served as director of education in the Tonga Islands, in the South Seas, came from Randsfjord, Norway.

Many hundreds of schools, elementary, secondary, normal, and technical, are being maintained by various Norwegian organizations in Roumania, Soudan, Madagascar, Union of South Africa, India, and China. Thousands upon thousands of citizens of those countries owe their education to the schools thus maintained.

Instructors of Norwegian origin have taught in Sofia College, Bulgaria; Constantinople College, Tyrkey; Robert College, Constantinople; American School of Classical Studies, Athens; and American University of Beirut (see Margareta Erikson, Inga Ravndal Keble, Max Herman Larsen, Dr. Carl W. Blegen, and Dr. George Sverdrup in the list of American Educators). On opening day in 1925, Sofia College was "filled to capacity." Robert College registered 650 students (730 students in 1928). Constantinople College (for women) enrolled 408. And the American University of Beirut received 1217 students. The students of Robert College came from seventeen different nations, and included Persians, Irakians, Syrians, Egyptians, the brother of Ismet Pasha (prime minister of Turkey), sons of deputies in the Grand National Assembly of Tyrkey, the crown prince of Iraq (the son of king Feisal), and many other notable persons—truly an opportunity for the sowing of the seeds of international understanding and good-will which it is hard to overestimate.

Gisle C. T. Johnson, for many years director of a school for girls in Galatz, Roumania, with an enrollment of 250 students before the war, was awarded King Carol's Medal of Merit in recognition of his educational work, and decorated with the Roumanian order of the Crown for his war-time services. Dr. C. W. Blegen, until recently assistant director of the American School of Classical Studies in Athens, was decorated by the king of Greece for his war-time services in Greece and Macedonia. In 1925, the late Dr. Fridtjof Nansen, whose remarkable scientific and

humanitarian work was recognized by the bestowal upon him of 222 diplomas, orders and medals from all parts of the world, was elected Lord Rector for three years of St. Andrews University, Edinburgh, Scotland (which position corresponds to that of president of the Board of University Regents in the United States). Lord Edward Theodore Salvesen, whose juristic attainments and personal qualities placed him upon the highest court in the British Empire, the Judicial Committee of the Privy Council (being a son of the late shipowner Christian Salvesen from Mandal), is now serving as a distinguished member of the Court of the University of Edinburgh.

When the Committee on Intellectual Cooperation was established in 1922 under the auspices of the League of Nations, one of the fourteen internationally known scholars and scientists appointed members of that committee was Dr. Kristine Bonnevie, of the University of Oslo, who, on her American tour in 1907, had the honor to be received by the President of the United States, Theodore Roosevelt.

When the International Committee of Historical Sciences was established at Geneva, Switzerland, in May, 1926, with a secretariat functioning from the Institute of Intellectual Cooperation in Paris, it elected as its president one of the world's leading historians, Professor Halvdan Koht of the University of Oslo, who presided at the Sixth International Congress of Historical Sciences held in Oslo in August, 1928, participated in by scholars of thirty nations, and was elected president of the ensuing Seventh International Congress, was called to lecture on history at Harvard and other American universities in 1929-1930, and is the author of numerous treatises dealing with international problems.

When the International Student Service was organized recently to assist students in all parts of the world, to help eliminate race prejudice and class distinction, to initiate and promote international research, and to create understanding and good-will among all the peoples of the earth, the person elected the first administrative secretary of the newlycreated organization, with headquarters in Geneva, Switzerland, was Dr. Dikka Reque, who formerly taught modern languages in Minneapolis high schools, served as translator for the government in Washington, D. C., took her Master of Arts degree at McGill University in Montreal, won a scholarship awarded annually by the government of France, and took her degree of Doctor of Philosophy at the University of Paris in 1930 with a dissertation on three authors of the two sister nations, Norway and Sweden.

And the recent president of the International Federation of University Women, having a membership of 37,000 representing thirty-one different nations of the world, was Dr. Ellen Gleditch, of the University of Oslo, upon whom Smith College in 1914 conferred the honorary degree of Doctor of Science, and upon whom the American people, on her tour of the United States in 1929, showered honors and affection in unbounded measure.

ROCKNE, KNUTE KENNETH, B.S. Killed in an airplane crash while en route to California, March 31, 1931. "South Bend, Ind., March 31.—News of the death of Knute Rockne came as a stunning blow to Notre Dame University and to all of South Bend. Flags throughout the city are at half staff. Men, women and children who knew the famous coach seem to be dazed by the sudden passing. The entire university is in mourning." N. Y.

Times, April 1, 1931.

"Nothing has ever happened at Notre Dame that has so shocked the faculty and student body as the tragic news that came at noon today of the accident which took the life of Knute K. Rockne. * * * Everybody was proud of Rockne. Everybody admired him. But far more than that, we loved him. Apart from the unique and deserved success which he achieved as director of athletics and football coach, he was a great personality, with the attributes of genius. His loss is in many ways irreparable." Dr. Charles L. O'Donnell, president of the University of Notre Dame.

"Knute can't be dead; I don't believe it! The best friend I ever had. Without doubt Rock was the greatest figure of intercollegiate athletics." Bill Ingram, coach, University of California. Tears welled into the drawn eyes of Glenn Warner, veteran mentor of Stanford University. "He was the greatest figure in football today," said Warner as his voice trembled.

"He had been about six years getting to the college at South Bend, Ind., after he graduated from the Northwestern Division High

School (now Tully) in Chicago. He had to earn the money first. By working as a railroad brakeman and later as a mail clerk in Chicago, he accumulated \$1,000 and reached the age of 22. * * * After his graduation in 1914, Rockne remained at Notre Dame to teach the young men * * * football. He did it with such success that the public in Chicago has paid as much as \$400,000 at the gate in recent years to see Notre Dame in one of its big games. Last year, as a physical indication of Rockne's influence on the corporate fortunes of the college, Notre Dame opened a \$750,000 stadium in South Bend, Ind." N. Y. Times, April 1, 1931. In 1925 Rockne was called to Columbia University at a salary of \$25,000 a year; the University of Notre Dame, however, did not release him from a ten-year contract signed the previous year at \$10,-000 a year. "As a coach, of course, Rockne's record is one of the most remarkable that any coach of any sport has ever piled up. * * * (In 1930) there were, throughout the country, North, South, East and West, twenty-three head coaches of football from Notre Dame without naming the assistants here and there. Notable among them are Walsh (Adam Walsh of the Yale Coaching Staff) and Rip Miller, who has this year been elevated to head coach at Navy." N. Y. Times, April 1, 1931. "One of the finest tributes to Coach Rockne and his football system has been the wide demand for coaches who learned the game from him. It is estimated that during the first dozen years of the Rockne regime between 50 and 60 Notre Dame players were engaged as football mentors in other colleges and universities in all parts of the country." N. Y. World-Telegram, March 31, 1931.

"He possessed a culture that made him equally at home when addressing a gathering of society folks and when speaking to a football squad." "He was the most outstanding football coach in the country. He will be remembered

not only for his instruction in football, but also for his instruction in clean sportsmanship." Albert O. Wittmer, Football Coach, Princeton University. "He was the greatest football coach and the finest fellow I ever knew." Lou Little, Football Coach, Columbia University. "Mr. Rockne was probably the greatest football genius this country has ever seen, but aside from that he was known and admired for his sterling qualities as a gentleman and a leader." Prof. Philip O. Badger, Chairman of the Board of Athletic Control, New York University. "Unquestionably the greatest of football teachers." Dr. Marvin A. Stevens, Head Coach, Yale University. "He was one of the greatest geniuses of all time." William J. Bingham, Athletic Director, Harvard University. "The most colorful figure of all football history has made his last touchdown. Always generous to an opponent and a god to his men, football loses its most brilliant personality, Notre Dame its greatest teacher of high character, West Point an ardent supporter." Major Ralph J. Sasse, Head Army Football Coach. "Knute Rockne was the finest character and the greatest leader football ever knew. Football will never know another like him." John F. Meehan, Football Coach, New York University, and president of the American College Football Coaches Association. "He was more than a creator of fine football teams. He was a builder of character. And because he was that, his untimely passing is a loss to the country." Patrick J. Hurley, Secretary of War.

Upon arrival of the body of Knute Rockne at Chicago on the way from Kansas, a throng of 15,000 persons stood at the Dearborn Street Station, including delegations from the University of Chicago, Northwestern University, Loyola and De Paul Universities, the Chicago Board of Trade, men high in political life and from every class, who "were on hand to pay tribute to the fame and friend-

ship of the genius of the gridiron." Judge Walter Steffen "stood bareheaded with tears coursing down his face as the body was sent on its way." Arriving at South Bend, "eight thousand persons stood in sorrowing silence" in that city.

"Knute Rockne is dead. And who was he? Ask the President of the United States, who dispatched a personal message of tribute to his memory and comfort to his bereaved family. Ask the King of Norway, who sends a special delegation as his personal representatives to this solemn service. Ask the several State Legislatures now sitting that have passed resolutions of sympathy and condolence. Ask the thousands of newspaper men, whose labor of love in his memory has stirred a reading public of 125,000,000 Americans. * * * What was the secret of his irresistible appeal to all sorts and conditions of men? * * * When we say that he was an inspirer of young men in the direction of high ideals that were conspicuously exemplified in his own life, we have covered much that unquestionably was true of him. * * * He might have gone to any university in the land and been gladly received and forever cherished there." Dr. Charles L. O'Donnell, president of the University of Notre Dame, at the funeral services, where thousands bared and bowed their heads. while millions listened over the radio as the services were being broadcast through a nation-wide network involving seventy-nine stations and carrying the words of the speakers to foreign countries.

"At 4 P. M. the cortege of fifty limousines, escorted by a squadron of nine motorcycle policemen, began its final journey to the cemetery. Thousands stood in massed formation and with heads bared in the little country graveyard, where the services again were brief and impressive. * * * Floral tributes, sent from everywhere, were in profusion at the Rockne home in Sunnymeade. The little spare lot was filled with them and the grave

was heaped high. Rockne's grave lies just off the beaten highway of Portage Road. It is located two and a half miles from the stadium that Rockne and his genius built as a fitting memorial to football, and along the road that once Knute, the immigrant Norse boy, traveled to Notre Dame twenty years ago with a worn suitcase in his hand." N. Y. Times, April 5, 1931. "His passing is a national loss." Herbert Hoover, President of the United States. (See biography on page 204.)
